Notes

UChicago’s HIRO is responsible for implementing the imaging guidelines and requirements for clinical trials at our site, ensuring imaging exams follow trial guidelines, and providing de-identified image data for research purposes. The HIRO works with the trial’s local research coordinators and data managers.

All HIRO personnel should be granted access to the image data submission/upload system. All imaging materials and manuals, and all imaging related queries, should be forwarded to HIRO personnel. The HIRO general email address should be cc’d on all imaging-related communications.

For more information about the HIRO, please see https://doi.org/10.1016/j.acra.2019.04.003
